

IMBA Trailbuilding School: Designing, building and maintaining sustainable shared-use trails

Date & Times: Saturday, November 4, **TIME TBD**

Location: Explore Park

Description:

Learn about sustainable trail design and construction from the organization that literally wrote the book. This course is built on five training components consisting of Trailbuilding Theory, Essential Elements of Sustainable Trails, Designing Successful Trails, Building You Dream Trail, and Trail Maintenance.

The course will consist of three hours of classroom work followed by three hours of field work to apply sustainable trailbuilding concepts in real-world situations. This course is an essential tool for land managers and volunteer trailbuilders aspiring to raise their shared-use trail systems to the next level.

Pre-Requisites: None

Cost: \$100

Organization: International Mountain Bicycling Association (IMBA)

Workshop Coordinator: Anthony Duncan - anthony.duncan@imba.com
Andy Williamson - andy.williamson@imba.com
