

# AORE Annual Conference 2020 - PheedLoop Platform

## HOW TO VIEW AND ENGAGE WITH SESSIONS

Once a session is clicked into from the schedule in the virtual portal, it will automatically start live-streaming at the scheduled time. You may see a pre-roll video play while you wait for a session to begin. If it's a pre-recorded session, you will see options to play/pause/stop the presentation yourself.

This is a sample of a live-stream presentation. We can see the presenter, the presenter is screen sharing a presentation, and we also have access to a session chat, list of other attendees, and the ability to participate in the chat.

Some presentations will use Sli.do, a live, online, free engagement platform that allows presenters to more easily use polls, Q&A and other feedback methods. If a presenter is using sli.do, you will see an ENGAGE tab next to STREAM. Click on that at any time (or as the presenter directs) to participate in polls, etc. Sli.do can also be downloaded to any smart phone or accessed via a web browser. Each presentation that uses sli.do will provide a unique access code for participants to enter and join the poll or other engagement.
